Disease Investigation

Reviewed/Revised Date: August 6, 2020
Approved by: Administrative Council
Responsible Official: College Cabinet

Policy Statement

Disease Investigation

For the purposes of disease investigation and controlling the spread of COVID-19, if a student/faculty/staff member is identified as a close contact to a case, some limited information including the contact's name and phone number will be shared with Public Health for the purposes of follow-up. Contact tracers will destroy any identifying information including the name and phone number once the close contact is no longer in quarantine.

When a close contact is notified of possible exposure, they may opt out of sharing this information with KDHE and/or Wyandotte Health Department.
